BIOGRAPHY
Fabian von Spreckelsen

Fabian von Spreckelsen is a German artist based in Maastricht, the Netherlands. Already as a kid he had a deep fascination for nature handed down from his father: as biologist he guided Fabian to the discovery of the enchanting world of living organisms.

Since then, the relation and interaction between a constructed surrounding and the just uncultivated nature have driven his interest. He is fascinated by the ties between humans and the natural structures around and he interprets in his designs continuously nature as powerful asking for respect rather than for protection.

This results in a work drawing the power lines of flora and fauna into abstract geometries with both strength and beauty of wildlife in its simplest form, sometimes abstracted to the edge of recognition. The lines in his work are clear-cut and simplified, his hand-crafted approach creates unique pieces with a specific personality, the diversity of his works reflects the variety in nature. He aims for a fine balance between arithmetic designer, working craftsman and environmentally engaged artist.

Révélation, International Fine Craft & creation Biennial

Grand Palais, Paris (FR)

By opening Spazio Nobile in April 2016, in the dynamic and cosmopolitan Ixelles neighbourhood of Brussels (Belgium), Lise Coirier and Gian Giuseppe Simeone have united their passions for design and art history, initiating a dialogue between contemporary applied arts, design and photography. Commissioning installations that are both experimental and artistic, with a particular sensibility to everything connected to nature and minerality, the gallery organises four to five exhibits each year, dedicated to both rising and established talents. Without creating borders between the disciplines, the visual arts interact with the fine arts. www.spazionobile.com
