Meisenthal *L'Âge du Verre*

La verrerie de Meisenthal est née en 1704 dans le Nord du Massif des Vosges, dans l'Est de la France. L'usine qui compta jusqu'à 650 salariés ferma ses portes en 1969. En 1992, le Centre International d'Art Verrier [CIAV] de Meisenthal rallume un premier four de fusion sur la friche industrielle. Son objectif est de préserver l'héritage technique de son territoire et de réinscrire la production verrière traditionnelle dans son époque en accueillant des créateurs contemporains dans ses ateliers. D'un côté il y a le verrier, sa main, sa connaissance de l'alphabet technique traditionnel, son audace. De l'autre le créateur, son univers, ses questionnements. Et entre les deux, l'envie d'écrire ensemble de nouvelles histoires d'objets. Pour les créateurs, au-delà du verre, c'est le village de Meisenthal tout entier qui devient matériau de construction. Ses habitants, la friche industrielle, ses ouvriers-fantômes, ses embruns matinaux, la forêt majestueuse... l'esprit des lieux en somme, qui génère une énergie unique, endémique, qui sans nul doute transparait dans les objets qui naissent là-bas... Le CIAV édite, sous la marque « Meisenthal-France », de petites séries d'objets en verre répondant de la mécanique de croisement entre une tradition technique multi-séculaire et les rêves portés par des créateurs contemporains.

Les pièces présentées dans l'exposition ont été imaginées par des artistes ou des designers. Elles font l'objet de séries ouvertes ou limitées, sont parfois des pièces uniques ou des prototypes.

Meisenthal *The Age of Glass*

The Meisenthal glassworks was founded in 1704 in the massif des Vosges du Nord, in eastern France. The factory, which counted 650 staff, closed its doors in 1969. In 1992, the International Glass Art Centre (Le Centre International d'Art Verrier, or CIAV,) of Meisenthal restarted the first kiln on the brownfield site. CIAV's objective was to preserve the technical heritage of the region and to reinstate the traditional glassworks production by welcoming contemporary designers into the workshops. On one side is the glassworker, his hands, his knowledge of the traditional technical alphabet, his self-assurance. On the other is the designer, his universe, his questionings. And between the two, the desire to write, together, new stories of the objects. For the designers, beyond the glass itself is the entire village of Meisenthal, which becomes building material. The residents, the brownfield land, the ghosts of its workers, its morning mist, the majestic forest... in other words, the spirit of the sites, which generates a unique, endemic energy that is reflected in the objects that are born there ... CIAV edits, under the « Meisenthal-France » brand, small series of glass objects that fulfil the mechanics of the crossover between traditional multi-secular technique and the dreams of the contemporary creators.

sur dibond / series of 15 pieces + 1 photo 750 mm x 940 mm

mounted on dibond

- Pièces à l'unité / single pieces

Photo: la Marchéalerie

Does the act of blowing an entire production into another production, within another technical context exemplify the act of erasing something to better reveal it? François Daireaux collected 404 toras (rings of around 200 glass bangles strung together) in various colours, from the village of Firozabad, India. In addition to the Blow Bangles installation, made up of 404 “imprints” of these toras, re-melted and blown in a selection of 404 historic moulds conserved at Meisenthal, small series have been edited.

Madone des Verriers

ClAV Meisenthal-France 2005

Réédition d'une Madone produite par la verrerie de
Goetzenbruck vers 1870 / Re-edition of Madonnas
produced by the Goetzenbruck glassworks around 1870
Statue

verre soufflé, argenture / blown glass, silvering
Ø 190 mm

Photo: Guy Rebmeister

In the second half of the 19th century, silvered glass was called Bauernsilber (farmers' silver), which perfectly imitated silverware without the high price. In the local popular tradition, glass Madonnas ornamented the niches above entry doors, and were placed in wooden constructions nailed to trees to chase away evil spirits or to thank the deities for a favour. They were also displayed in homes, in a traditional small family altar.

By opening Spazio Nobile in April 2016, in the dynamic and cosmopolitan Ixelles neighbourhood of Brussels (Belgium), Lise Coirier and Gian Giuseppe Simeone have united their passions for design and art history, initiating a dialogue between contemporary applied arts, design and photography. Commissioning installations that are both experimental and artistic, with a particular sensibility to everything connected to nature and minerality, the gallery organises four to five exhibits each year, dedicated to both rising and established talents. Without creating borders between the disciplines, the visual arts interact with the fine arts.
